Faculty of Science & Technology Savitribai Phule Pune University, Pune

Syllabus for SY M. Sc. (Computer Applications) (2023 Pattern)

(With effect from A. Y. 2024-25)

Preamble

The field of computing is rapidly expanding and changing, especially, since the last decade with continuous emergence of new disruptive technologies such as artificial intelligence, data science, cyber security, Internet of things, robotics and so on.

21st Century has witnessed rapid technological developments in every sector including the field of Computing. Moreover, it has created new job roles and massive job opportunities for budding graduates.

Premium Institutes, public and private Universities, autonomous and affiliated colleges in India have always played a crucial role in producing human resources with required skill sets by capturing and monitoring these developments and offered various UG and PG programmes.

The Savitribai Phule Pune University, Pune has made its significant contribution by offering degree programmes as per the trends from time to time. In the year 1989, it started offering a degree programme Bachelor of Computer Science (BCS), now called B. Sc. (Computer Science) and was its unique offering in the state of Maharashtra. Later the University offered undergraduate and graduate programmes such as Master of Computer Management (MCM), Bachelor of Computer Applications (BCA), Master of Computer Science), M. Sc. (Computer Applications) etc.

The Savitribai Phule Pune University, Pune has taken a leading role in design and implementation of Programmes as per the guidelines and recommendations of National Education Policy (NEP) 2020. The university decided to offer UG and PG programmes with features recommended by NEP-2020 such as Multiple-entry/exit, inter and multi-disciplinary education, focus on skilling, on-job training/field projects, research, incorporation of Indian Knowledge System etc for the holistic development of students.

The university has adopted the guidelines provided by the state Sukanu Samittee and prepared the credit structure for PG programmes vide its circular No. 122/23.

The Ad-hoc Board of Studies in Computer Applications has prepared a structure for M. Sc. (Computer Applications) with following features

- The structure of the course is designed as per National Education Policy (NEP) 2020 and is in line with University circular 122/23.
- The total credits offered for the two years (level 6.0 and level 6.5) with four semesters are 88 with 22 credits assigned for each of the four semesters.
- The programme has Multiple Entry/exit feature.
- Various types of courses includes Mandatory Courses (MC), Mandatory Elective (ME), Research Methodology, On-job Training (OJT)/Field Project (FP) and Research Project (RP)

I am thankful to Hon. Vice-Chancellor Prof. Dr. S W. Gosavi, Hon. Dean of FoS&T, Prof. Dr. M G Chaskar for their guidance. I am thankful to all board members Prof. Dr. Rahul Patil, Prof. Dr. Razak Sayyad, Mr. Atul Kahate and Mr. Milnd Tanksale for their valuable inputs as well as the teachers from affiliated colleges for their active participation in preparing the draft syllabus.

Prof. Dr. S S Sane Chairman, Ad-hoc Board of Studies in Computer Applications Faculty of Science and Technology, SPPU

M.Sc. (Computer Applications)

Objectives

The objective of the Program is to produce trained software professionals with hands-on experience on state-of-the art technologies who will be able to handle challenges in IT industry. The objectives of M.Sc. (Computer Applications) program are: -

- To produce knowledgeable and skilled human resources that is employable in IT and ITES.
- To impart knowledge required for planning, designing and building Complex Application SoftwareSystems as well as to provide support for automated systems or applications.

M.Sc. (Computer Applications) Program is of Two Years duration with four semesters. It is a Full- Time post graduate Degree Program. The program is based on credit system comprising of total 88 credit points.

It is believed that the proposed syllabus as part of the credit-based system will bring a qualitative change in the way M.Sc. (Computer Applications) is taught, which will offer a more enriched learning experience. It aims to provide students with the knowledge and ability to develop creative solutions, and better understand the effects of future developments of computer applications, systems and technology on people and society. The students shall develop self and life-long learning skills.

Eligibility

- (a) Bachelor Degree in Science/Technology/Engineering OR
- (b) Bachelor of Computer Applications (B.C.A.) OR
- (c) B.Sc.(Computer Science) OR
- (d) Bachelor of Computer Science (B.C.S.) OR
- (e) B.Sc.(Information Technology) OR
- (f) B.Sc.(Data Science) OR
- (g) B.Sc.(Cyber and Digital Science) OR
- (h) B.Sc. (Cyber Security) OR
- (i) B.Sc. (Cloud Computing) OR
- (j) Bachelor of Engineering(BE/B.Tech) in Computer Engg/Computer Science & Engg./ Computer Science and Design/ Information Technology/Electronics and Telecommunication/AI and Data Science/AI and Machine Learning/ equivalent OR
- (k) B. Voc. in Software Development/Information Technology OR
- (I) B.Sc. with Computer Science as Principal Subject OR
- (m) General B.Sc. with Computer Science as one of the subject at TYBSc level Programme

Programme Outcomes:

After successful completion of the Programme, the students shall be able to

PO 1: Demonstrate understanding of fundamental and advance concepts in emerging areas

PO 2: Design and develop innovative computer applications.

PO 3: Analyze existing research reported in the literature

PO 4: Propose alternate solutions by undertaking research work.

PO 5: Create efficient, reliable, readable and maintainable code.

PO 6: Demonstrate a deeper understanding of the chosen domain.

PO 7: Select appropriate method to solve the given problem

PO 8: Explain complex technical concepts clearly and effectively, both in written and oral forms.

PO 9: Demonstrate ability to collaborate effectively with team members, understand different perspectives, and contribute productively to become successful professional.

PO 10: Demonstrate ability to work with integrity and a sense of social responsibility.

PO 11: Demonstrate self and life-long learning skills

PO 12: Solve computational problems innovatively

PO 13: Apply knowledge gained and critical thinking to develop real-world applications.

Lab in-charge share	nts, and handwritten write- ent, software and Hardware opy of program codes w	t in the form of journal. Journal consists up for each assignment. Write-up shall requirements, Date of Completion. with sample outputs of all performed rogram codes submitted by students. For ogram prints.					
stude	ents. For each lab assign as timely completion, un	boratory work is to be carri ment, the instructor shall a derstanding and neatness w	ed out based on overall performance of ssign grade/marks based on parameters ith appropriate weightage.					
		Suggested Laboratory As	signments					
01	Implement depth first sear	C						
02	Implement Breadth first se	earch algorithm						
03	Use an undirected graph a	nd develop a recursive algorith	hm for searching all the vertices of a graph					
04	Implement A star Algorith							
05	Implement AO star Algori	thm						
06)	hm to implement selection so						
07		hm to find single source short	*					
08		hm to obtain Minimum Spann						
09	-	•	tomer interaction application.					
10	Develop an Expert syste	m for a Hospital or any suit	able application.					

SAVITRIBAI PHULE PUNE UNIVERSITY **SECOND YEAR M. Sc. (COMPUTER APPLICATIONS)** SEMESTER III CA 605 MJP: Lab Course Based on CA 602 MJ **Teaching Scheme:** Credits **Examination Scheme:** Laboratory: 4 Hrs./Week 02 **Continuous Evaluation: 15 Marks End-Semester : 35 Marks Course Objectives** ٠ Develop in depth understanding for implementation of the regression models. Learn supervised and unsupervised machine learning algorithms. Study Artificial Neural Networks **Course Outcomes** After successful completion of the course, students will be able to Implement and evaluate linear regression and random forest regression models. Apply and evaluate classification and clustering techniques. **Guidelines for Instructor's Manual** The instructor shall frame at least 14 assignments. Instructor's manual consisting of University syllabus, list of assignments, conduction & Assessment guidelines is to be developed. **Guidelines for Student Journal** The laboratory assignments are to be submitted by student in the form of journal. Journal consists of Certificate, table of contents, and handwritten write-up for each assignment. Write-up shall include Title, Problem Statement, software and Hardware requirements, Date of Completion. Students shall submit softcopy of program codes with sample outputs of all performed assignments. Lab in-charge shall maintain softcopy of program codes submitted by students. For reference, one or two journals may be maintained with program prints. **Guidelines for Assessment** Continuous assessment of laboratory work is to be carried out based on overall performance of students. For each lab assignment, the instructor shall assign grade/marks based on parameters such as timely completion, understanding and neatness with appropriate weightage. **Suggested Laboratory Assignments** Visit websites providing datasets for Machine learning from various domains such as Finance, Healthcare, Science etc and download. For example download datasets named "Australian Credits", "BUPA", "Ionosphere" etc. Study the datasets and prepare a descriptive table giving name of the dataset, URL from where it was downloaded, type of dataset (Synthetic/Real-world), No. of Attributes, no. of records, number of classes (if applicable) etc. Download any open source software such as WEKA and install. Download in-built datasets and include their description in the table mentioned above. Carry out following assignments Using any open source software such as WEKA and its datasets, perform classification using 01 Naïve Bayes classifier, note accuracy 02 Using any open source software such as WEKA and its datasets, perform classification using C4.5 – the decision tree classifier 03 Using any open source software such as WEKA and its datasets, perform classification using Neural network classifier

04 Perform assignment 1 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 1 above

 note the accuracy and compare it with accuracy obtained in assignment 2 above 06 Perform assignment 3 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 3 above 07 Perform assignment 1 above using any available instant selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 1 above 08 Perform assignment 2 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 1 above 		
 06 Perform assignment 3 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 3 above 07 Perform assignment 1 above using any available instant selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 1 above 08 Perform assignment 2 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 2 above 09 Perform assignment 3 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 2 above 09 Perform assignment 3 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 3 above 10 Perform assignment 2 above using both attribute and instance selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignments 2, 5 and 8 above 11 Using any open source software such as WEKA and its datasets, perform clustering using 'EM' algorithm 12 Implement K-Means clustering/ hierarchical clustering on sales_data_sample.csv dataset. Determine the number of clusters using the elbow method. 	05	Perform assignment 2 above using any available attribute selection algorithm in WEKA and
 note the accuracy and compare it with accuracy obtained in assignment 3 above 07 Perform assignment 1 above using any available instant selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 1 above 08 Perform assignment 2 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 2 above 09 Perform assignment 3 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 3 above 10 Perform assignment 2 above using both attribute and instance selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 3 above 10 Perform assignment 2 above using both attribute and instance selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignments 2, 5 and 8 above 11 Using any open source software such as WEKA and its datasets, perform clustering using 'EM' algorithm 12 Implement K-Means clustering/ hierarchical clustering on sales_data_sample.csv dataset. Determine the number of clusters using the elbow method. 		note the accuracy and compare it with accuracy obtained in assignment 2 above
 07 Perform assignment 1 above using any available instant selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 1 above 08 Perform assignment 2 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 2 above 09 Perform assignment 3 above using any available attribute selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 3 above 10 Perform assignment 2 above using both attribute and instance selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignment 3 above 10 Perform assignment 2 above using both attribute and instance selection algorithm in WEKA and note the accuracy and compare it with accuracy obtained in assignments 2, 5 and 8 above 11 Using any open source software such as WEKA and its datasets, perform clustering using 'EM' algorithm 12 Implement K-Means clustering/ hierarchical clustering on sales_data_sample.csv dataset. CA 631 RP: Research Work - I

Teaching Scheme:	Credits	Examination Scheme:
Laboratory: 8 Hrs./Week	04	Continuous Evaluation: 30 Marks
		End-Semester : 70 Marks

Course Objectives

• To provide hands-on experience to research work

Course Outcomes

After successful completion of the course, students will be able to

- Apply research methodology to carry out research in a chosen problem domain
- Design and develop a novel methodology / framework etc
- Conduct experiments and analyze results

Guidelines for carrying out Research work

Each student shall carry out the research work during semester III under the guidance of the appointed faculty Advisor/Mentor. Students shall work on a research problem and publish a paper / file a copyright / patent based on the work carried out. The student shall prepare and submit a report based on the work carried out consisting of – Face Page, certificate, Acknowledgement, Abstract, Table of Contents, List of Tables, List of Figures, Abbreviations, and separate Chapters dealing with Introduction, Literature Review, Design details of Proposed System, Experimental Results and analysis, and a chapter providing Conclusions and future scope. List of Publications, Copyright/patent, references and appendix shall also be included in the report.

Guidelines for Assessment

The work carried out shall be evaluated on a continuous basis by the assigned faculty advisor / mentor for 30 marks and panel of examiners appointed shall evaluate the work based on the report for 70 marks.

SEMESTER IV

SAVITRIBAI PHULE PUNE UNIVERSITY					
SECOND YEAR M. Sc. (COMPUTER APPLICATIONS)					
	SEMESTER IV				
CA 651 MJ: Industrial Training					
Teaching Scheme:	Teaching Scheme: Credits Examination Scheme:				
Laboratory: 24 Hrs/Week12Continuous Evaluation: 100 Marks					
	End-Semester : 200 Marks				

Course Objectives

- To provide opportunities for students to get professional experience
- To learn and understand real life/industrial situations
- To get familiar with various tools and technologies used in industries and their applications.
- To nurture professional and societal ethics

Course Outcomes

After successful completion of the course, students will be able to

- To demonstrate professional competence
- To apply knowledge gained through training to complete academic activities in a professional manner
- To choose appropriate technology and tools to solve given problem.
- To demonstrate abilities of a responsible professional and use ethical practices in day to day life.
- To analyze various career opportunities and decide carrier goals

Guidelines for Industry Training

Industry training is an educational and career development opportunities, providing practical experience in a field or discipline. It is far more important as the employers are looking for employees who are properly skilled and having awareness about industry environment, practices and culture. Industry training is structured and supervised training often focused around particular tasks or projects with defined time scales.

Core objective is to expose students to the industry environment, which cannot be simulated/experienced in the classroom and hence creating competent professionals in the industry. Industry training is intended to provide students with an opportunity to apply conceptual knowledge from academics to the realities of the field work/training.

Duration:

The student is expected to carry out online/offline industry training for minimum of 360 hrs during the winter vacation of 4-6 weeks (with at least 30hrs/week) and during semester IV

Identifying place/work for Industrial training

Student may choose to undergo Industry training at Industry/Govt. Organizations/NGO/MSME/Research Labs/Institutes. Students must get training proposals sanctioned from college authority well in advance. Internship work identification process should be initiated in the 3rd semester in coordination with training and placement cell/ industry institute cell. This will help students to start their internship work on time. Also, it will allow students to work in vacation period after their 3rd semester examinations.

Student can undergo training in the form of the following but not limited to:

- Industry / Government Organization
- Working for consultancy/ research project
- Contribution in Incubation/ Innovation/ Entrepreneurship Cell / startups cells of institute
- In-house product development, intercollegiate, inter department research internship under research group, micro/small/medium enterprises/online internship,
- Research internship under professors from reputed Institutes/Research organizations,
- NGOs
- Participate in open source development.

Diary/Workbook:

Students must maintain daily Diary/ Workbook. The main purpose of maintaining diary/workbook is to cultivate the habit of documentation. The students should record in the daily training diary the day-to-day account of the observations, impressions, information gathered and suggestions given, if any.

Internship Diary/workbook and Internship Report should be submitted by the students along with attendance record duly signed and stamped by the industry/organization where the training was carried out

The student shall prepare and submit a report based on the work carried out consisting of –

- Title/Cover Page
- Training completion certificate
- Details of place of training- Company background-organization and activities/Scope and object of the study / Supervisor details
- Index/Table of Contents
- Introduction
- Title/Problem statement/objectives
- Motivation/Scope and rationale of the work carried out
- Methodological details
- Results / Analysis /inferences and conclusion
- Suggestions / Recommendations for improvement to industry, if any
- Attendance Record
- Acknowledgement
- List of references (Library books, magazines and other sources)

Guidelines for Assessment

The work carried out shall be evaluated on a continuous basis by the assigned faculty advisor / mentor for 100 marks and panel of examiners appointed shall evaluate the work based on the report for 200 marks.

SAVITRIBAI PHULE PUNE UNIVERSITY SECOND YEAR M. Sc. (COMPUTER APPLICATIONS) SEMESTER IV

CA 660 MJ: Management Information System

Teaching Scheme:	Credits	Examination Scheme:
Theory: 2 Hrs./Week	02	Continuous Evaluation: 15 Marks
		End-Semester : 35 Marks

Course Objectives

- To learn fundamentals of Information Systems.
- To know methodology and applications of MIS
- To understand how Information System supports in decision making and knowledge management.
- To be familiar with various technologies of MIS

Course Outcomes

After successful completion of the course, students will be able to

- Define need, objectives and architecture of MIS and its role in business planning
- Enlist activities for development of MIS
- Demonstrate understanding of DSS and Knowledge Management
- Describe applications and various technologies of MIS

Course Contents				
Unit I	Introduction to Information Systems	06 Hrs		
	Need and objectives of Information systems. Components and resources of			
	information systems, Types of information systems: Operations support			
	systems and Management support systems.			
	Management Information Systems (MIS): Definition, role and impact of			
	MIS, Functions of the managers: planning, organizing, staffing, coordinating and directing, MIS as a support to the management			
	Management of Business: Concept of Corporate Planning, Essentiality of			
	strategic planning, development of business strategies, types of strategies,			
	MIS for strategic Business Planning			
Unit II	II MIS Development and BPR			
	Development of Long range plans of the MIS, Determining Information			
	Requirements, Development and implementation of MIS, Managing			
	Information Quality, MIS – Development process model			
	Business Process Re-engineering (BPR) – Introduction, Business Process,			
	Process and Value Stream model of the organization, MIS and BPR			
Unit III	Decision Support Systems and Knowledge Management	06 Hrs		
	Decision Support Systems (DSS): Concept and philosophy, Characteristics,			
	Components of DSS, tools, Using Decision Support systems: What-if,			
	sensitivity, Goal-seeking analysis and Optimization analysis, GDSS, DSS			
	application in E-enterprise			
	Knowledge Management systems, Knowledge-based expert system, MIS and			

	benefits of DSS		
Unit IV	Applications of MIS	06 Hrs	
	Applications in Manufacturing Sector: HR Management, Marketing		
	Management, Finance Management, Materials Management and Marketing		
	Management		
	Applications in services: Banking, Insurance, Airline, Hotel, Hospital,		
	Education		
Unit V	Infotech Infrastructure	06 Hrs	
	Technology for MIS – Data, Transaction, Application and Information		
	processing. Database and client-server architecture, MIS and RDBMS		
	Data Warehouse (DW) – Data in DW, Architecture and design of DW,		
	Organization, Management implementation of DW, Business Intelligence,		
	DW and MIS		
	E-Business – Introduction, models, security issues, Electronic payment		
	systems, Web enabled Business Management, MIS in Web environment		
Reference	ee Books:

SAVITRIBAI PHULE PUNE UNIVERSITY				
SECOND YEAR M. Sc. (COMPUTER APPLICATIONS)				
SEMESTER IV				
CA 681 RP: Research Work - II				
Teaching Scheme:	Credits	Examination Scheme:		
Laboratory: 12 Hrs./Week	06	Continuous Evaluation: 50 Marks		
		End-Semester : 100 Marks		

Course Objectives

• To get first-hand experience to apply research methodology

Course Outcomes

After successful completion of the course, students will be able to

- Apply research methodology to carry out research in a chosen problem domain
- Design and develop a novel methodology / framework etc
- Conduct experiments and analyze results

Guidelines for carry out Research Work

Each student shall carry out the research work during semester IV in an online/offline manner while working on "CA 651 MJP - Industrial Training" in industry/organization/institute under the guidance of the appointed faculty Advisor/Mentor by the respective Institute. Preferably this work may be an extension of research work carried out by a student as a part of Research Work – I in Semester III. Students shall work on a research problem and publish a paper / file a copyright / patent based on the work carried out. The student shall prepare and submit a report based on the work carried out consisting of – Face Page, certificate, Acknowledgement, Abstract, Table of Contents, List of Tables, List of Figures, Abbreviations, and separate Chapters dealing with Introduction, Literature Review, Design details of Proposed System, Experimental Results and analysis, and a chapter providing Conclusions and future scope. List of Publications, Copyright/patent, references and appendix shall also be included in the report.

Guidelines for Assessment

The work carried out shall be evaluated on a continuous basis by the assigned faculty advisor / mentor for 50 marks and panel of examiners appointed shall evaluate the work based on the report for 100 marks.
